## Changes

- What date did the previous infusion happen?\*** make the answer unchangeable as 15<sup>th</sup> Nov 2025.
- What date is the next infusion?\*** make the answer as 1<sup>st</sup> Aug 2026 unchangeable.
- Confirm patient's weight\*** - default should be 0
- Confirm patient's treatment dose\*** - default should be option given to select with other 2 options as they are.
- Exact required dose:** 177.50 mg  
**Suggested (mixed):** 0x70 mg + 2x100 mg (Total 200 mg · Waste 22 mg / 11.00%)  
 Add how required dose is calculated.
  - Then required dose as it is.**
  - Then suggested mix, formatted properly.**

## Open Full Dose & Vial Optimizer

Two vial strengths are available: 70 mg & 100 mg.

6.

For this I want the dose calculator to have an icon taking taking of space and rest half is a button redirecting to the official guideline by TGA which is uRL that currently takes me to GSK au page.

### Dose & Vial Optimizer — 70 mg / 100 mg

×

Patient weight (kg)

71

Dose regimen (mg/kg)

2.5 mg/kg (Start)

▼

Max total vials

10

Two strengths only: 70 mg and 100 mg. No underdosing.

Enter weight to calculate.

Cancel

Apply to form

7.

The pop up needs to be more intuitive guiding HCP – will all things default to zero and "Max vial option: is not changeable just an indication save space.

For this option and calculation part only show top 3 options with least wastage in a better design more intuitive to read etc.,

Disable Apply to form option for now but leave it there assisting HCP to calculate and put the final number with one

2.5 mg/kg × 70.9 kg → Exact 177.25 mg (rounded to 178 mg for vial calc).

| Option                      | 70 mg vials | 100 mg vials | Total (mg) | Waste (mg) | Waste (%) | Total vials |
|-----------------------------|-------------|--------------|------------|------------|-----------|-------------|
| Option 1 <b>Least waste</b> | 0           | 2            | 200        | 22         | 11.00%    | 2           |
| Option 2                    | 3           | 0            | 210        | 32         | 15.24%    | 3           |
| Option 3                    | 2           | 1            | 240        | 62         | 25.83%    | 3           |
| Option 4                    | 1           | 2            | 270        | 92         | 34.07%    | 3           |
| Option 5                    | 4           | 0            | 280        | 102        | 36.43%    | 4           |
| Option 6                    | 0           | 3            | 300        | 122        | 40.67%    | 3           |
